Skills

- JavaScript | TypeScript
- Backend | Frontend | Full-Stack | Game Development | DevOps
- NodeJs | Bun | Hono | Express | MongoDB | React | NextJS | Tailwind | Phaser | Spark AR | Docker | Kubernetes

Experience

SDE-2 (Full Stack)

Pazo

Bangalore 12/2022 - Current

- Led infrastructure migration from traditional VPS to Kubernetes with autoscaling and introduced Docker-based containerization, significantly improving deployment consistency and scalability.
- Implemented observability using OpenTelemetry with a self-hosted collector, and Prometheus for system monitoring.
- Modernized the frontend by upgrading from React 16 to React 19, replacing the legacy build setup with Vite, and transitioning routing and styling to TanStack Router and TailwindCSS with shadcn/ui, significantly improving performance and developer experience.
- Led the transition to Turborepo and TypeScript, actively removing deprecated libraries and reducing technical debt across the codebase.
- Built internal APIs and tooling. Won an internal AI Hackathon by creating a chatbot that delivered real-time insights from platform data.

Full-Stack Developer

4Lunches Creative Tech

Bangalore 01/2021 - 12/2022

- Delivered interactive campaigns for clients like **BigBazaar**, **Aditya Birla**, and **V-Mart**, reaching **2 lakh+ users** using technologies like Node.js, MongoDB, and Phaser.
- Built backend services for data capture, real-time tracking, and coupon generation, along with visual dashboards for analyzing engagement metrics.
- Created development tools like a multi-atlas generator and 2D collision engine to streamline game workflows.

Game Developer | Freelance

Prize&Fun SAS

France

- Built web-based games for the Chiro app using **Phaser**.

Projects

- **CivicFix - Whatsapp Bot (Runner-up, [Meta LLaMA AI Hackathon 2024](#))**: AI-powered bot for civic issue reporting like road damage, garbage disposal or electricity outage via text, image, and audio, supporting multiple languages.
- **Whatsapp Bot Builder (Work in progress)**: A no-code platform to design and deploy WhatsApp bot flows through a visual interface.
- **Aditya Birla**: Built a gamified responsive interface to recommend health insurance products based on user preferences and inputs.
- **Big Bazaar & V-Mart**: Created campaign games with score tracking, automated coupon distribution (150k+), and real-time performance dashboards.
- **Sandisk**: Developed a backend to ingest media via API and auto-generate timeline videos.
- **Royal Enfield**: Contributed to a responsive product launch site for the Meteor 350.

Others

- **Runner up - Meta LLama AI Hackathon**: Recognized for *CivicFix*, an AI powered WhatsApp bot for reporting civic issues and issue Management. **Reference: [Meta Llama AI Hackathon Blog](#)** (10/2024)
- **Won - Pazo AI Hackathon**: Developed a chatbot that provided real-time analytical insights from system data, improving accessibility and decision-making. (12/2023)
- **Bet 2 Code**: Won 5th prize at an onsite coding competition held by **Indian Institute of Science Bangalore**. (02/2020)
